The sun is a powerful force of nature. It gives us life, warmth, and light. But it can also be a source of danger and destruction. In *How To See The Sun*, award-winning travel writer and photographer David Doubilet takes us on an extraordinary journey to some of the most remote and awe-inspiring places on Earth, where the sun's power is on full display.

From the hidden depths of the Our Book Library rainforest to the remote peaks of the Himalayas, Doubilet reveals the beauty and fragility of our planet. He introduces us to the people who live in these extraordinary places and shows us how they have adapted to the challenges of living in some of the most extreme environments on Earth.

How To See The Sun is a stunningly beautiful book that will change the way you see the world. It is a must-read for anyone who loves nature, photography, or adventure.
