Race And The Unmaking Of An American Family is a powerful and moving memoir that explores the complexities of race and family in America. The author, Lee Pitts, tells the story of how his family was torn apart by racism and prejudice.

Pitts's father was a white man and his mother was a black woman. They met and fell in love in the 1950s, when interracial marriage was illegal in many states. Despite the challenges they faced, they married and had two children, Lee and his sister.

The family lived in a small town in the South, where they were subjected to constant racism and discrimination. Lee's father lost his job, and the family was forced to move several times. Lee and his sister were often teased and bullied at school.

Despite the challenges they faced, the family remained close. Lee's parents taught him and his sister about the importance of love, acceptance, and forgiveness. They also taught them about the history of racism in America, and how it had shaped their lives.

As Lee grew older, he became more aware of the racism that still existed in America. He saw how it affected his friends, his family, and himself. He also saw how it divided the country.

Lee's memoir is a powerful indictment of racism in America. It is a story of love, loss, and hope. It is a story that will stay with you long after you finish reading it.
