

Why Prevention Fails and How We Can Do Better

By [Author's Name]

Prevention is widely recognized as the key to improving public health. But despite decades of effort and billions of dollars in funding, prevention programs have failed to deliver on their promise. In his new book, [Author's Name], a leading expert in public health policy, argues that the reason for this failure is that we have been focusing on the wrong things. We have been trying to prevent the wrong diseases, in the wrong way, and with the wrong people.

Rethinking Suicide: Why Prevention Fails, and How We Can Do Better by Craig J. Bryan

[Author's Name] draws on decades of research to show that the most effective prevention programs are those that focus on the social and economic conditions that create health problems in the first place. He argues that we need to shift our focus from individual behavior change to

changing the environments in which people live and work. This means investing in affordable housing, education, and job training; promoting healthy eating and physical activity; and reducing air pollution and other environmental hazards.

Why Prevention Fails and How We Can Do Better is a call to action for a new approach to prevention. It is a must-read for anyone interested in public health, policy, or social change.

Table of Contents

- Chapter 1: The Failure of Prevention
- Chapter 2: The Social Determinants of Health
- Chapter 3: The Role of Policy
- Chapter 4: The Power of Prevention
- Chapter 5: A New Approach to Prevention

Reviews

"[Author's Name] has written a powerful and persuasive book that challenges the conventional wisdom about prevention. He shows that the most effective prevention programs are those that focus on the social and economic conditions that create health problems in the first place." - [Reviewer's Name]

"*Why Prevention Fails and How We Can Do Better* is a must-read for anyone interested in public health, policy, or social change. [Author's Name] provides a comprehensive overview of the current state of

prevention efforts, and offers practical advice on how to make them more effective." - [Reviewer's Name]
